

COLLABORATIVE ROBOTS

BENEFITS & PROCESSES

SET UP & GO!

Programming requires no special skills

Cobots can be unpacked, mounted and programmed to complete simple tasks in just hours

MAKE MORE, FASTER

Increase productivity

With the right configuration, a cobot produces finished goods at a much faster rate than handcrafting or assembly lines

DEPLOY & REDEPLOY

Create flexible workflows

Cobots are highly versatile and easily re-programmed and re-deployed for different tasks as new needs arise.

SAVE COSTLY SPACE

Compact options for more room

Although traditional robots are generally quite large, cobots use a fraction of the space required by conventional automation.

OPTIMIZING PEOPLES ROLES

Adding assistance to your current production

Cobots don't replace people, they make employees more valuable. Relegate your repetitive tasks to cobots and put your people on higher-value work. Or have a single employee manage multiple cobots. It's a great way to scale production!
